

Dear Sir / Ma'am

I am an Information Technology graduate from MediCaps Institute of Science and Technology, Indore. I am interested in speaking with you about the full stack web developer opening in your company. I have hands on experience in developing web applications using MERN stack. I am looking for a place where I can implement and enhance my full stack web development skills.

During my studies at AttainU , I have had the opportunity to hone my skills in Front end web development using ReactJS and Redux, And in back end web development using NodeJS, MongoDB and Handlebars. With this knowledge I am able to build heavy front end based application using ReactJS and Redux which facilitates users to manage all their social media accounts with single app and hence saving time and energy also I created a heavy backend based application using NodeJS and Mongo Atlas which allows anyone to share any type of news without revealing their identity. Inside the classroom I have committed myself to academic excellence. Outside of the class room, I mentored juniors in their heavy backend based project using Node and ExpressJS, which facilitated users to know about the quality of the food in the restaurants in their locality.

I am currently available for an interview scheduled at the convenience of your company. I have attached my resume detailing my academic knowledge and my technical skills. +919039881182 is my number I would appreciate the chance to discuss any possible opportunities within your company and to provide you with further information.

Your time and consideration is greatly appreciated. I look forward to hear from you soon,
Abhishek Malviya
