PROJECTS

Bring The Change	AttainU	May 2019

Built a video news portal where people can upload videos anonymously.
- [Bring The Change News Portal](#) | [Github](#).
- I created admin panel where admin approves and rejects the videos submitted.
- I implemented various authentication mechanisms like express session for handling session.
- The challenge which I faced was how to keep track of approved and unapproved videos and I overcame the challenge by using a boolean expression.

Bring The Change

Built a website where users can share posts on multiple social media platforms.
- Post IT | [Github](#).
- I created whole application where user can link their social media accounts to Post IT application and can create posts and share them on multiple social media platforms.
- I used Redux for state management and used twitter API for creating and deleting tweets from twitter.
- The challenge which I faced was to handle the data coming from twitter API and for that I created an express application which handled all the twitter data.

LANGUAGES & TECHNOLOGIES

- MERN Stack - Javascript (ES5 & ES6), MongoDB, Express, React , Redux ,Node
- Python, PostgreSQL, Heroku & AWS

EDUCATION

Software Engineering	AttainU	Feb 2019 - Present
